

Executive Mayor, Cllr Nozuko Best hands over TLB's to service delivery departments.

The municipality bought three TLBs, nine bakkies and one vehicle to curb service delivery issues across the city. Only the TLBs were handed over on the 5th July 2022 by the Executive Mayor, Cllr Nozuko Best and her entourage to service delivery departments such as Electrical, Waste, Water and Roads. The municipality's employees underwent training on how to operate the TLBs. The other vehicles will be handed over to other different departments within the municipality in due course. When handing over the TLBs, Cllr Best said, "These will improve the quality of service as the municipality has been struggling to maintain the standard of services required by the city."
