The appointed service provider will provide a clear set of technical activities and standards for prepaid meters, which will guide the funding/investment model, planning, procurement, execution, installation and operational management. Furthermore, to establish monitoring and evaluation procedures ensuring optimal usage and performance.

3. Contextual Background

Merafong City, as a pivotal municipality within the Gauteng province, strives to enhance its service delivery in water, electricity, and sanitation infrastructure. To achieve sustainable urban development and improve quality of life for its residents, adequate financing is imperative for critical infrastructure projects, including prepaid meters, bulk infrastructure, and utility account settlements with Rand Water and Eskom.

The city has a diverse revenue base supported by the following areas: Carletonville, Khutsong,

Fochville, Kokosi, Greenspark, Welverdiend, Wedela, Blybank and Mining Towns. Developing an efficient revenue collection system requires an understanding of the underlying causes and dynamics of the current situation. The revenue collection problem often begins not when a client defaults but much earlier in the revenue cycle, during service applications, billing processes, and various other aspects of revenue management where proper controls may be lacking.

The overall performance of the municipality over the past five years has been characterized by significant challenges related to service delivery, financial management, and socio-economic conditions. While there have been positive initiatives aimed at improving operations and fostering local development, the municipality continues to grapple with issues that hinder optimal performance. Addressing these challenges and capitalizing on opportunities for collaboration will be critical to revitalizing the municipality and enhancing the quality of life for its citizens, as espoused in the Re-imagining Merafong vision 2035.

It is against this background and aiming at changing lives for the better through the provision of services to communities, the municipality intends to procure the services of a team or consortium of experienced service providers to assist in the procurement / sourcing financing and implementation of transactions (water services & electricity) for revenue generating programmes and related services. The preferred team will be selected on the basis of their capability, experience, and track record.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:

- a) take all reasonable steps to prevent such abuse;
- b) reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
- c) cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.

4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
